PROFESSIONAL SUMMARY

Senior Data Scientist and AI/ML Engineer with 5+ years of experience designing, deploying, and optimizing AI-driven systems across multiple industries. Specializes in AI agent development, large language model fine-tuning, computer vision, and scalable AI solutions including recommendation engines, predictive analytics, and real-time personalization platforms. Proven track record building production agentic systems with governed tool registries, permission controls, and audit logging, alongside computer vision research (MICCAI, ICPR, DSN) applying hybrid transformer and graph neural network architectures to medical imaging. Proficient in Python, TensorFlow, PyTorch, Transformers, and cloud platforms (AWS, GCP, Azure). Skilled in MLOps, API integration, and end-to-end deployment of intelligent systems that enhance user engagement, streamline operations, and deliver measurable business impact, adaptable across industries and use cases.

WORK EXPERIENCE

GoPaddi | Senior Data Scientist/AI Engineer

Mar 2026 – Present

- Architected and led the build of GoPaddi's Unified AI Agent, establishing intent routing, tool execution, permissions, approvals, audit logging, and model governance across 8+ product verticals.
- Shipped 6+ production AI solutions (supplier chat, Deal Card AI, Scout, Ally, and model management), extending AI coverage across support, CRM, finance, and recruitment via reusable, documented AI endpoints.
- Delivered the model management system for the Unified Agent and strengthened service reliability with validation, auth-aware routing, and prompt-injection protections, cutting production incidents by 35%.

Lighthill Investment Limited | AI & Automation Engineer / Innovation Team Lead

Feb 2025 – Mar 2026

- Led the Innovation Team, designing and deploying AI-powered automation systems that streamlined investment operations and replaced repetitive manual workflows, improving operational efficiency and access to real-time financial information.
- Engineered real-time financial data pipelines and monitoring systems that automatically captured stock-exchange prices, tracked market movements, and processed changing market data to support faster investment analysis and decision-making.
- Built a multi-agent AI investment intelligence system for stocks, Bitcoin/cryptocurrency, and other financial assets, orchestrating specialized agents for market-data retrieval, technical and economic analysis, forecasting, and synthesis of actionable investment insights.

Health Strategy and Delivery Foundation | AI/ML Engineer

Oct 2024 – Feb 2026

- Designed and fine-tuned domain-specific LLMs for healthcare triage, achieving 90%+ triage accuracy and later adapting them into travel-health advisory agents delivering real-time safety recommendations.
- Built multimodal AI agents processing structured medical data and unstructured patient notes into personalized reports, driving a 25% increase in customer retention, and deployed RAG-based Q&A systems for healthcare workers.

Skyway Aviation Handling Company | Machine Learning Engineer

Feb 2023 – Sep 2024

- Built transformer-based recommendation engines with collaborative filtering, increasing user retention by 18% through personalized travel suggestions.
- Containerized ML pipelines (Docker, Kubernetes), built model-serving infrastructure that cut inference latency by 40%, and automated MLOps workflows that reduced time-to-production by 30%.

TIPTHORP | AI/ML Engineer

Mar 2021 – Jan 2023

- Fine-tuned LLMs for multimodal travel content generation across 12 content types, boosting engagement by 15% over 6 months.
- Built LLM-powered chatbots and RAG-based recommendation agents serving 1,000,000+ users, resolving 82% of queries without human escalation.

RESEARCH EXPERIENCE

- Structure-Aware Denoising for Pediatric Chest X-Rays, MICCAI 2025 (Best Poster Award). Co-developed a dual-decoder denoising framework, raising pneumonia classification accuracy from 88.8% to 92.5%.
- VAMAE: Vessel-Aware Masked Autoencoders for OCT Angiography, ICPR 2026. Co-developed a vessel-aware self-supervised autoencoder improving vessel segmentation in limited-label settings.

ACHIEVEMENTS

- Kaggle BIPOC Fellowship, Top Project Award (1,000+ participants); Hamoye Data Science Fellowship, 2nd Best Project (500+ teams).
- Top 5 Graduating Student, Department of Statistics, University of Nigeria, Nsukka.

SKILLS

LLMs & Generative AI, AI Agents, RAG, NLP, Computer Vision, MLOps, Python, PyTorch, TensorFlow, FastAPI, Docker, Kubernetes, Hugging Face, MLflow, SQL

CERTIFICATIONS

AI/ML Engineer Certification (AI Summer of Code) • Machine Learning Scientist with Python (DataCamp) • Data Scientist in Python (DataQuest) • Software Engineering & System Design (Educative.io)

EDUCATION

University of Nigeria, Nsukka | B.Sc. Statistics

2020 – 2024

- GPA 4.03/5.00, Second Class Honours (First Division Equivalent); Top 5 of graduating class.

Obafemi Awolowo University | Civil Engineering

2016 – 2019
